

Cybersecurity Navigator

Unmatched Security Strategy and Guidance by HCTI Security Experts - Exceptional Results, Reduced Security Costs

Introduction:

In today's digital landscape, relentless cyber threats demand constant vigilance. HCTI's cybersecurity services act as your guardian, providing a comprehensive security solution. Powered by the Cynomi AI-driven platform, our team of experts combines cutting-edge technology with decades of experience to fortify your defenses, redefine security standards, and secure your digital future with unwavering confidence.

The Challenge

Smaller Businesses Need Cybersecurity Expertise, But Hiring a Full-Time Isn't Always Feasible

The Solution

HCTI's Cybersecurity Navigator - Defining, Managing, and Optimizing Your Security Programs. HCTI's cybersecurity Navigator offers a cost-effective solution, delivering high-level expertise to minimize risk and reduce IT resource burden.

Our Services:

Comprehensive Risk Assessments

We analyze your cybersecurity risk profile to identify vulnerabilities, threats, and potential breaches.

Compliance Readiness

We ensure compliance with regulations like HIPAA, PCI-DSS, GDPR, and support for ISO 27001.

Customized Security Policies

Our team crafts personalized security frameworks aligned with your organization's needs.

Remediation Plans with Prioritization

Our team creates strategic plans with prioritized tasks, clearly explained for easy implementation.

Ongoing Management & Optimization

We oversee the implementation of plans, monitor your security posture, and adjust as needed.

Cyber Posture Reporting

We provide detailed reports on your security posture, progress, compliance gaps, and industry comparisons.

How Our Cybersecurity Navigator Works

A scalable and eclectic approach to Cybersecurity Navigator Platform

Step 1

Automated Cyber Profile

Together with you, we fill in a short series of questionnaires to assess your current policies, processes, and tools. We also perform internal and external scans of your environment. Based on the answers and scan results, we automatically build a unique cyber profile for your organization.

Step 2

AI-Driven Assessment

Leveraging the Cynomi Cybersecurity platform - powered by proprietary AI algorithms and modeled on the expertise of the world's best Cybersecurity - we parse your cyber profile against relevant external resources like the NIST Cybersecurity Framework, ISO 27001, CIS and other standards, industry benchmarks, and industry-based threat intelligence.

Step 3

Day-to-Day Cybersecurity Operations

We show you your current risk level, compliance readiness and overall cybersecurity posture, along with the tailor-made policies and remediation plan we created for you. Then we move to ongoing cybersecurity management - working with you daily to achieve and maintain the level of security and compliance we defined together. We constantly update your security posture, risk level, policies, plans, and tasks based on changes in your IT environment or processes, changes in compliance requirements and the relevant threat landscape.

Benefits

Realize your security vision

Our Cybersecurity Navigator develops a roadmap, creates plan of action, and implements changes. The result: we help you realize your cybersecurity vision.

Get the right policies for YOU

We create a set of security policies and remediation plans tailored to your unique business and industry ensuring you have the right controls in place to mitigate risk

Maintain compliance

We conduct automated and continuous compliance readiness assessments, then create an actionable plan with a prioritized task list to achieve and maintain compliance, while tracking progress toward compliance goals.

Continuously manage cyber posture

Unlike one-time risk assessments that generate security posture and risk snapshots, our Cybersecurity Navigator continuously assesses and updates your real-time security posture, risk level and compliance readiness.

Get the benefits of a Cybersecurity Navigator

Our Cybersecurity Navigator provides you with the desired strategic support to improve your security posture without hiring an expensive full-time security executive.
